Fall Collection 2021

The new season elegantly embraces casual wear. Let's make it comfortable but keep it chic. Lush fabrics form a strong foundation for clothes that can be moulded to any mood or occasion. Flowy satin, smooth velvet and cosy alpaca yarns are smoothly mixed with vintage denim, the softest lamb leather and comfy Tencel. As with every new season, we strive to make our designs more sustainable, developed under the Aware label.

Summum classics such as the trouser suit, executed in both familiar and new colours, are accompanied by loungewear including soft hoodies and matching wide trousers, as well as new shapes like culottes and sleeveless cardigans. Light colours, ivory and shell are seen throughout the season. They receive a winter glow with shades of brown, grey, black and navy with mauve, greens such as teal and seafoam, and a lemon curry for extra sparkle. It's not about contrasts, but about feeling confident in a cool, sophisticated way. Whether that's in denim, faux leather or the real deal is up to the Summum woman, who wears her outfits with joy and pride.

The buying period takes place from the 25th of January up to and including the 12th of March.

capsule 6 - will be delivered in July
capsule 7 - will be delivered in August
capsule 8 - will be delivered in September

AWARE LABEL

The below fabrics are part of this seasons AWARE label:

JERSEY:
90310 / 30271 / 30273 / 30259:
95% EcoVero viscose, 5% elastane
The viscose in this fabric is EcoVeroTM viscose from Lenzing, a yarn made from wood pulp sourced from sustainable, FSC or PEFC-certified forests. The closed loop production process used to make this yarn recycles both water and solvents. Please visit www.ecovero.com for more information.

30285: 50% cotton, 50% EcoVero modal
This fabric is a blend of cotton and modal. Just like viscose, modal is made from cellulose fibres from beech trees. EcoVero modal by Lenzing has a positive CO2 footprint. Lenzing's closed loop production process keeps both emissions and water consumption to a minimum. In comparison with cotton, the production process for Lenzing's modal requires considerably less land and 10 to 20 times less water.

30281: 100% organic cotton
This fabric is made from organic cotton. The cotton was grown under strictly controlled conditions, without genetic modification and without the use of toxic pesticides or other harmful chemicals.

30278: 76% organic cotton, 12% polyester, 12% polyamide
This fabric is made using organic cotton. The cotton was grown under strictly controlled conditions, without genetic modification and without the use of toxic pesticides or other harmful chemicals.

30258: 95% organic cotton, 5% elastane
This fabric is made from organic cotton. The cotton was grown under strictly controlled conditions, without genetic modification and without the use of toxic pesticides or other harmful chemicals.

ACCESSORIES:
8394-8398-8399: 100% cow leather
All of Summum's belts are made in the Netherlands using leather that complies with the European REACH regulation for the use of chemicals. The leather used is residual waste from the European food industry and is processed and coloured by a Dutch tannery. The buckles and other metal parts are nickel free.

BLUE DAZE:
5081: 98% organic cotton, 2% elastane
This denim fabric is made up of 98% recycled cotton. The cotton was grown under strictly controlled conditions, without genetic modification and without the use of toxic pesticides or other harmful chemicals. For the wash, only recycled water was used.

5098: 98% organic cotton, 2% elastane
This denim fabric is made up of 98% recycled cotton. The cotton was grown under strictly controlled conditions, without genetic modification and without the use of toxic pesticides or other harmful chemicals. For the wash, only recycled water was used.

KNIT:
7832: 35% viscose, 35% polyamide, 30% wool
This blended fabric is made from 30% mulesing-free merino wool – to produce this wool, the merino sheep are reared and farmed in an animal-friendly way to ensure sustainable wool production. In addition, this blend consists of 35% FSC-certified viscose.

7834: 71% alpaca, 29% recycled polyester
This knit is made from an Italian yarn consisting of expensive, undyed alpaca wool and polyester extracted from post-consumer recycled PET bottles. Omitting the usual bleaching and dyeing process and adding only recycled polyester to the yarn limits the environmental impact of this material.

CMT:
11505: 100% viscose
Approximately 51% of the viscose in this fabric is EcoVero TM viscose from Lenzing, a yarn made from wood pulp sourced from sustainable, FSC or PEFC-certified forests. The closed loop production process used to make this yarn recycles both water and solvents. Please visit www.ecovero.com for more information.

11507: 100% viscose
This viscose is a 100% FSC Mix product, which means that the yarn is made from a mix of wood pulp from FSC-certified forest, FSC-controlled wood and post-consumer recycled wood. The raw material in this material is therefore 100% organic, sustainably produced and partly circular.

11508: 100% viscose
The warp thread in this fabric is made from ENKA® viscose, a filament yarn made from wood comprising 40-50% cellulose – the most common organic and recyclable plant material. ENKA® uses only cellulose from wood with the FSC label sourced from local, legal and sustainably managed forests in Sweden, Finland, Estonia and Scotland. ENKA® works with a self-developed policy that promotes sustainable forest management and protects old-growth forests. Please visit www.enka.de for more information.

11515: 100% viscose
Approximately 51% of the viscose in this fabric is EcoVero TM viscose from Lenzing, a yarn made from wood pulp sourced from sustainable, FSC or PEFC-certified forests. The closed loop production process used to make this yarn recycles both water and solvents. Please visit www.ecovero.com for more information.

11517: 70% polyester, 30% recycled polyester
30% of the polyester yarns in this material are made from recycled polyester. Recycled polyester is made from post-consumer recycled plastic such as PET bottles, making it a greener and more sustainable alternative to virgin polyester yarns. As well as shrinking the world's plastic waste mountain, the production process requires less water, less use of chemicals and less energy.
